Description

Ampac offer a range of remote indicators which are designed for fire detection systems requiring local indication of an individual or group of detection devices located in concealed areas. Applications include floor and ceiling voids spaces, roof spaces, lift shafts and escalator machine rooms. They may also be used for other applications requiring local visual indication such as plant process control and shutdowns, security control stations and hidden or out of site ancillary equipment.

There are two versions available, the standard Round Style incorporates the LED only together with a range of text legends and the Single Gang version which is available with optional Buzzer or Buzzer with Mute facility.
