

Fire detection and evacuation solutions that save lives.

# Decorative Flush or Surface Mount Door Holder

## Features

- High Quality Bright Chrome, Lacquered Brass & Stainless Steel
- Flush or Surface Mount
- 24V DC or 230V AC Supply Voltage
- 200N (20kg) Holding Force
- Zero Residual Force
- Integral Release Switch
- Floor Mount Bracket (optional)

## Description

Decorative Door Holders are particularly suitable for installation in prestigious projects such as Hotels, Offices, Historical Buildings and Museums. Built around a robust fascia plate for flush mounting and supplied with a back box, the Door Holders are available in Bright Chrome, Lacquered Brass or Stainless Steel finish with matching Decorative Keeper Plate. An optional Surface Mount Kit is available in matching finishes, with 20mm entry holes and blanking plugs for surface mount applications.

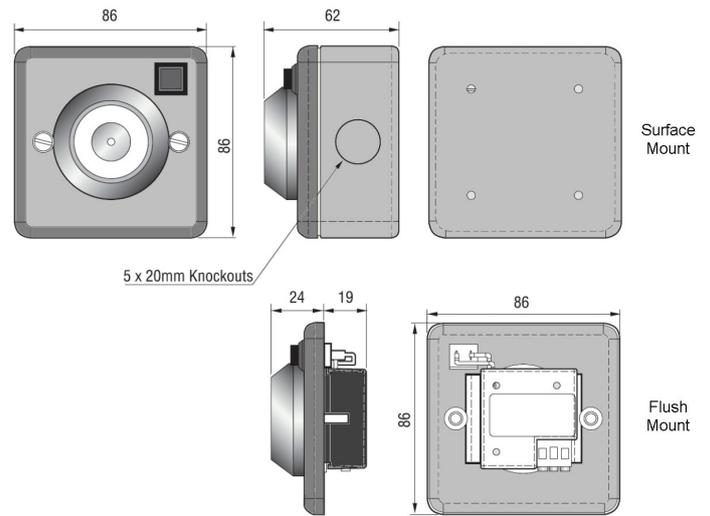

Designed to allow doors to be held open under normal conditions and released during a fire alarm condition, the Door Holders are simple to install and commission and are suited to a wide range of applications including:

The Door Holders are 24Vdc or 230Vac powered and incorporate a built in switch to enable manual release of the door during emergencies or for maintenance purposes. The 230Vac unit includes a filter for EMC emissions. Internal diodes dissipate any “back EMF” on switch-off reducing wear at the control unit.
