

Stainlesss Steel UV/IR² Flame Detector

The Ultra-Violet, dual Infra-Red (UV/IR²) Flame Detector is designed to protect areas where open fires may be expected and detects most flames from hydrocarbon fires with 4.3 μ m emissions through to invisible fires such as hydrogen.

The UV/IR^2 Flame Detector is sensitive to flickering, low frequency (1–15Hz) infra-red radiation along with ultra-violet emitted by flames during combustion.

This detector has a UV sensor and two IR sensors which respond to different wavelengths of both the ultra-violet and the infra-red spectrum. The signals from these sensors are processed by the detector and checked for characteristics of a flame. The simultaneous detection of both the UV and the IR light by the sensors will signal an alarm. False alarms from flickering sunlight, arc welding and lightning are eliminated by a combination of UV and dual IR signal processing techniques.

The UV/IR2 detector has selectable output options of relay contacts or 4 to 20mA signal as standard.

Features

- Highest immunity to false sources
- Solar blind
- Suitable for indoor and outdoor areas
- · Unaffected by convection currents, draughts or wind
- Proven response to multiple fuel types
- Multi-spectrum detection
- Selectable output options
- Selectable response speed
- Selectable sensitivity levels
- Built in auto and manual test
- Low current consumption
- Fast response to fire

Applications

- Refineries
- Generators
- Compressor stationsHigh voltage equipment
- Power plants
- Fuel loading racks
- Chemical plants
- Tunnels
- Nuclear power sites

- Storage tanks
- Engine rooms
- Pharmaceutical production
- Military applications
- Marine Industry
- Aircraft hangars
- Petrochemical offshore/onshore
- LNG/LPG production

Item Number

4108-2014 Stainlesss Steel UV/IR2 Flame Detector

Accessories

4108-3001 Stainless Steel Adjustable Mount 4108-3003 Stainless Steel Weather Shield 204-0032 Portable Flame Detector Tester

Approvals:

Worldwide approvals include EN54:10, with VdS and LPCB certification, as well as SIL 2 rated.

Mechanical Specification

Housing Material	Change to Stainless Steel 316 housing	
Housing Colour	Natural	
Dimensions	142(H) x 108(W) x 82(D) mm	
Weight	2kg	
Cable Gland Entries	2 x 20mm	
Wiring	1.0 to 4.0mm ²	

Electrical Specification

14 to 30Vdc		
8mA, RL2 energised		
4mA, current loop, RL2 off		
3mA, RL2 off		
28mA, RL1 & RL2 energised		
20mA, current loop, RLI & 2 off		
9mA, RLI energised		
2 seconds max.		
14 to 30Vdc		
Normally Open or Normally Closed		
Latching or Non-latching		
I.0A Max.		
50Vdc Max.		
30W Max.		
(Note: Resistive Loads Only)		

Environmental

Operating Temperature	-10°C to +55°C	
Storage Temperature	-20°C to +65°C	
Relative Humidity	95% Non condensing	
IP Rating I	IP65	

Performance

Range - Class I*	0.1 m ² n-heptane at 25m		
- Class 3	0.1m ² n-heptane at 12m		
	(see EN54:10 for sensitivity settings)		
Field of View	90° min. Cone		
Spectral Response			
- UV	185 to 260nm		
- IR	1.0 to 2.7μm		

Approvals

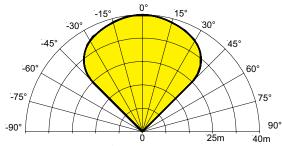

CPD	0832-CPD-0970		
LPCB	729a/12		
VdS	G212190		
SIL 2	C127_CT001_(2.0)		

Response Characteristics – High Sensitivity

•		· ·		
Fuel	Flame Size m (ft)	Distance m (ft)	Factory Tested Distance m (ft)	Average Response time (seconds)
n-Heptane* (Yellow flame)	0.3 × 0.3 (I × I)	25 (82)	60 (196)	8
Methylated Spirit* (Clear flame)	0.5 × 0.5 (1.6 × 1.6)	25 (82)	60 (196)	12
Hydrogen (non-visible flame)	0.1 × 0.5 (0.3 × 1.6)	12 (39)	30 (98)	16

^{*} has been tested and approved at Class I

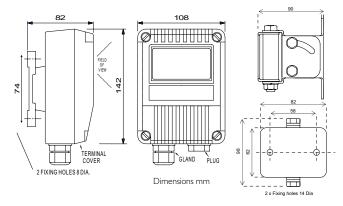

Field of View

To meet the requirements of EN54:10 clause 5.4, where the ratio of the response points Dmax:Dmin should not exceed 1.41, the horizontal and vertical viewing angles max should not exceed $\pm 30^{\circ}$.

Flame Detector

Mounting Bracket

Installation Recommendations

Please refer to our User Manual for mounting and wiring instructions. The installation of Talentum® flame detectors should be undertaken in accordance with recognised national or international standards and codes of practice.
