

Fire detection and evacuation solutions that save lives.

Ampac Loop Tester

Features

- Lithium-ion battery powered, complete with multi-regional mains adaptor
- Seven-inch LCD touch screen display
- Choice of languages
- USB Connectivity
- Software updates via the Ampac Website
- Works with XP95, Discovery and Core Protocol ranges

Description

The Ampac Test Set is a hand-held, portable test unit with a seven inch LCD touch screen display. It enables the user to interrogate, control and maintain any devices that are connected to it, whether individual; or a complete circuit of devices. It also provides loop diagnostic and programming options. Software updates are easily installed in the field using built-in USB connectivity.

Supplied in a robust carry case complete with universal charger, connector cable, XPERT8 Intelligent Mounting Base and carry strap.

Operation

The Ampac Loop Tester is designed for indoor use only and should not be subjected to harsh environments. It should not be used in Intrinsically Safe enclosures or other hazardous areas such as those containing dust or explosives. It should not be used in the areas where temperatures and/or humidity are high or go through rapid changes.

Technical Information

All data is supplied subject to change without notice. Specifications are typical at 12 V, 23°C and 50% unless stated otherwise.

Specifications

Power Source	Lithium-ion battery pack or 12
Battery Charging time	Approx 3 hours
Operating Temperature	0°C to 40°C
Humidity (no condensation or icing)	10 to 95% RH
Dimensions	215mm x 165mm x 50mm
Weight	935g

Item Numbers

4112-2009	Ampac Loop Tester
