FireFinder SmartTerminal Model 4380-0003

Description

The FireFinder Plus SmartTerminal has been designed to display the status of and provide limited controls for the FireFinder Plus Fire Alarm Control Panels (FACP) in multiple locations.

The SmartTerminal provides the following front panel controls

- Override – for overriding any programmed Delays.
- Reset – to reset faults and alarms
- Evacuate – to initiate an Evacuation condition at the FACP
- Alarm Silence/Resound – to silence or resound Alarms.
- Previous and Next – to scroll through faults and alarms

Communication between each SmartTerminal and the FACP is provided by the Communications Driver Board fitted in the FACP

A maximum of 30 SmartTerminal's may be connected to the communications bus over a distance of 1.2Kms.

The SmartTerminal can be supplied with three different sized enclosures and is available as internally 24Vdc powered or externally 240Vac powered options.
