

ECA (Electrical Contractors Association)

Ampac is proud to protect the Electrical Contractors Association (ECA) Head office in Sevenoaks.

ECA have been a strong driving force in the electrotechnical and engineering services industry since the Association's formation in 1901. ECA continues to work on improving standards, supporting the industry and creating a sustainable business environment.

Location: UK, Sevenoaks in Kent
Systems: FireFinder^{PLUS} and Devices
Completed: 2022

The Challenge

Ampac's partners Triple Star Fire and Security Ltd (TSF) needed to replace and update the existing fire system which had become obsolete. TSF wanted to ensure they future proofed the system, using the latest technology available. They were also up against some tight deadlines to hand over the project in a timely fashion with as little disruption as possible.

The Solution

Ampac provided fire detection system, comprising of a FireFinder Plus Panel with XP95 devices to replace the existing wired system. In addition, Ampac provided audio-visual notification devices and Apollo Reach wireless devices were installed to ensure for the additional areas had sufficient detection coverage. A Nimbus Gateway device was also installed, delivering systems 24/7 cloud management and client visibility.

The System Included:

- 1 x Firefinder 2 Loop Panel
- 77x XP95 Opticals
- 6 x XP95 Heat
- 14 x Call Points
- 12 Intelligent Interfaces
- 3 x REACH Hubs
- 12 x REACH Opticals
- 12 x REACH Sounder Bases
